- May 12 - October 13
SipSynergy : Junior developer
LAMP Stack work on company's multiple client platforms. Small office environment, with large responsibilities.

Background

Self taught developer with a passion for elegant and efficient code. Now focusing on JavaScript having started with LAMP stack. Qualifications include a BSc in Environmental sciences, a hand full of A-levels including computing and the usual GCSEs.

Having worked a variety of different jobs almost without gaps since the age of 16 I took up coding with the view to succeed. I differ to most developers since coming from a non-computing background in addition to keen problem solving skills, I also like to/ try to take great involvement in UI/UX and the general style of a project.

Personal interests include Skiing, Diving, traveling, music (inc playing Drums & Guitar), and art.
